

◆ MEN RULE 00 • THE AMENDMENT LAW – THE RULE ABOVE THE RULES

ANUPAM KUMAR • IN FORCE FROM AUGUST 24, 2026 • ONE PAGE • KEEP PRINTED • SITS ABOVE ALL OTHER RULES

RULES CHANGE ONLY ON SUNDAY • ONE AMENDMENT A WEEK • NEVER WITHIN 48 HOURS OF BREAKING ONE
A CONSTITUTION'S POWER IS ITS AGE

THE LAW

- 1 • **SUNDAY ONLY:** a rule may be changed only at the Sunday weekly review, in writing, on the review sheet. Never verbally, never "from tomorrow", never at night. The version of me that writes laws works on Sunday mornings; every other version of me only OBEYS them.
- 2 • **ONE AMENDMENT PER WEEK, MAXIMUM.** If three things feel wrong, I fix the biggest one and live with the rest for seven more days. Most complaints about a rule dissolve before their Sunday arrives – that is the filter working.
- 3 • **THE 48-HOUR COOLING LAW:** no rule may be touched within 48 hours of my breaking it. The man who just broke a rule and wants it "adjusted" is not the lawmaker – **he is the addict negotiating.** He gets heard on Sunday, sober, in writing, never at the scene of the breach.
- 4 • **THE FREEZE:** Rules 01 (Phone) and 02 (Office) are **FROZEN until 22 NOVEMBER 2026** – 90 days untouched. Every week a rule survives unedited it gains the authority that willpower never had. New rules enter as DRAFTS and are signed only after surviving one full week unmodified.
- 5 • **THE CAP – TEN RULES, NO MORE:** the constitution is complete at Rules 01-10 plus this page. A man with forty rules has none. If a new rule truly must exist, an old one must retire the same Sunday.
- 6 • **THE PENALTY CEILING:** maximum **50 penalty-km outstanding in any week**, across all rulebooks. Debt beyond that is not paid by more walking – it triggers a Sunday SYSTEM REVIEW, because heavy penalty-debt means a rule is broken, not a man. Penalties never compound. Ever.

THE PRICE OF A BREACH

A rule edited off-Sunday, or inside the 48-h cooldown	THE CHANGE IS VOID + 30 KM.
A new rule adopted without its one-week draft	VOID. REDRAFT.

Paid within 24 hours, daylight only, logged in pen on Sunday – same terms as every book.

WHY – MY OWN NUMBERS

Rule 01 went through 27 versions in two days. The training plan, five rewrites in three. And the fifteen-year record reads: fifty systems, fifty collapses. The pattern is not weak discipline – **my systems have never been broken by failing to follow them; they have been broken by redesigning them.** Rebuilding gives the same dopamine the scroll gave, dressed in virtue.

So this page exists to protect the constitution from its author. I do not need more rules. **I need my rules to grow old.**

The lawmaker works on Sunday. Every other day of the week, I am only a citizen.

◆ MEN RULE 01 • PHONE RITUALS – THE RULE BOOK

ANUPAM KUMAR • IN FORCE FROM AUGUST 24, 2026 • ONE PAGE • KEEP PRINTED

DRAWER AT HOME • BAG AT WORK • TOOL OUTSIDE
DEAD 7:00 PM → 9:00 AM, EVERYWHERE ON EARTH • NO FEEDS – OR I WALK

THE RULES

- 1 • **HOME ZONE – drawer only:** inside the house the phone is ON in exactly one place: the hall drawer. **Use there is UNLIMITED** – standing, any OTP, authenticator, code, order, 9:00–7:00. It never leaves the drawer space ON; moving within the house = powered OFF.
- 2 • **WORK ZONE – bag or car, never the desk:** at the office the phone waits in the bag or the car, silent. The desk is for the market, not the phone.
- 3 • **WORLD ZONE – tool in hand:** road, mall, hospital, parking, party, travel – carry it, PAY with it (UPI), navigate (in the car: propped in a holder or seat – never handled while driving), book, click, call. **STANDING** and **MOVING** use only: never on a couch, never at a dining table, never idle-sitting with it.
- 4 • **THE NIGHT:** 6:40–6:55 PM at the drawer – log the day • sync Strava/HAE • cook's menu → **POWER OFF at 7:00, everywhere on Earth** (traveling: the hotel safe = the drawer). ON again 9:00 AM. Between those hours it is furniture.
- 5 • **THE WATCH IS THE WORLD'S DOOR:** eSIM shares my number – rings even with the phone off (confirmed). Calls, favourites, the 3:30 alarm, workouts, gym music via AirPods. **Charged daily at breakfast – covenant-grade.** Door OTPs (Urban Company, deliveries) are read off the wrist – SMS mirrors there.
- 6 • **NO SOCIAL MEDIA LIVES ON ANY PHONE I OWN. EVER.** Instagram, YouTube, every feed – never installed, on any phone (the system posts my proof automatically; email confirms it). Downtime 7 PM–9 AM • grayscale • Screen Time passcode locked away. **THE INSTALL TAX – the only legal social session:** go to a COFFEE SHOP or CO-WORKING SPACE → install → do the task → **DELETE before leaving the building.** Never installed at home, at the office, or "just for tonight". **THE LAPTOP TOO:** YouTube + Instagram blocked in the browser (hosts file). Listening happens on the **Apple Watch + AirPods** (its battery is the natural time cap) or the **iPod** – no screen ever plays a feed. What remains on the phone is a code-machine with a camera.
- 7 • **ORDER OF TOOLS – watch → desktop → drawer:** wrist first (codes, calls, gym music) • desktop for orders, bookings, WhatsApp Web, broker TOTP • the drawer for app-only jobs (Snabbt check-in). ₹200 + card in the scooty.

THE PRICE OF A BREACH

WRONG PLACE (not used): carried ON through the house • lying on the office desk • alive in a pocket at home **10 KM. WALK IT.**

USED OFF-ZONE: used at home anywhere except the drawer • used sitting on a couch, a bed, or at a table **30 KM. WALK IT.**

I SCROLLED: a feed reinstalled, or one scrolling session – anywhere on Earth **50 KM. WALK IT.**

PAID WITHIN 24 HOURS OF THE BREACH. NO EXTENSIONS. Daylight hours only – sleep is never the currency, no walking after 7 PM. Sunday: the long run comes first; the walk follows the same afternoon. 30/50 km may split across 2 consecutive days – the first kilometres inside the 24 hours. Flat. No compounding. No negotiation. Logged in pen on Sunday.

THE TIMELINE

6:40 PM – logging ritual at the drawer: log • sync • menu
7:00 PM – **POWER OFF** • **8:15** router timer kills WiFi • **8:45** lights out
3:30 AM – **WATCH** alarm (+ clock backup). Phone stays dead
3:30–9:00 – the built hours: study 90' • swim • gym • study 2. Phone OFF
9:00 AM – powers on IN the drawer as the market opens. Unlimited standing use at the drawer till 7:00 PM. HAE syncs the morning workout by itself

WHY – THE CHAIN THIS PROTECTS

*Everything I want – the races, the two missions, the market – is manufactured in one place: the morning, 3:30 to 9:00. The morning exists only if the night ends at 8:45. So the whole system stands on one foundation: **the night.***

The phone is the only object in my life engineered, deliberately, by thousands of people, to take the night. My own data proves it worked: July 2026 – bedtimes 00:19–02:31 → sleep broke → training collapsed → the streak died. Fifteen years, fifty attempts, same ending, and every collapse began after dark with a screen.

*Willpower lost all fifty times. So this book does not use willpower – it uses geography. A phone that is only ever ON inside a drawer cannot take a night. **The drawer decides, so I don't have to. Guard the night, and the mornings build everything else.***

AWAY • EMERGENCY • SETUP

TRAVEL & VACATION EXCEPTION (declared – incl. foreign countries): the entire trip is **WORLD ZONE**. The phone is carried and used freely as a tool – **navigation & finding roads • TRANSLATION • tickets & boarding passes • cabs • payments/forex • photos • bookings • offline maps.** Feeds stay deleted – function travels, feeds don't. Hotel room: the **SAFE** = the drawer • still OFF at night (local time). Research/planning on the laptop. **Banned surfaces even on vacation:** beds • bathrooms • dining tables.

NIGHT EMERGENCY (watch can't do it): power it on IN the drawer, handle it, off again – an emergency is never a breach. **Races:** exempt, planned the night before.

SETUP: □ drawer + charger cable routed in (power bank fallback, charged Sundays) □ desktop TOTP □ WhatsApp Web □ feeds deleted + grayscale □ Downtime + passcode locked away □ router timer □ watch alarm + clock □ cash in scooty □ family told "my watch rings"

SIGNED: _____ **DATE:** _____

The phone did not steal my nights. I handed them over, one scroll at a time. From August 24 the nights belong to 3:30 AM.

◆ MEN RULE 02 • OFFICE & WORK ETHICS – THE RULE BOOK

ANUPAM KUMAR • IN FORCE FROM AUGUST 24, 2026 • ONE PAGE • KEEP PRINTED

SHUT DOWN BY 9:00 PM – THE WALL • SIX VAULTS STAY SHUT • ZERO GOSSIP ORIGINATED
LEAD BEFORE THE TITLE • THE WORK SPEAKS, I STAY QUIET ABOUT IT

THE RULES

- 1 • THE SHUTDOWN – OFFLINE FIRST:** normal close 7:00 PM, laptop in the bag, zipped. A war-day (planned, rare) may run to **9:00 PM – THE WALL**. **Nothing crosses it – the capital price stands behind it.** **THE LAPTOP'S TERRITORY:** the office room, and nowhere else in the house – it enters no bedroom, no hall, no dining space; at 7:00 it goes into the bag, and the bag lives in the office room. The closing ritual every day: capture every open loop → plan tomorrow's blocks → say "Shutdown complete." A written plan releases the mind the way finishing does; the man who cannot stop is still clinging to the fruits. (*Newport • Gita 2.47*)
- 2 • THE SIX VAULTS – NOTHING PERSONAL, EVER:** ① money (salary • trading P&L • purchases) ② family frictions ③ health ④ plans (job moves, ventures – announce AFTER, never before) ⑤ relationships ⑥ my verdict on any absent person. Warm but private: I am the best LISTENER in the room – I ask, remember, follow up; my openness is cricket, food, training, craft. Deflect-and-return: "All good – how did your migration land?" **Never disclose self-doubt about my own competence at work** – a senior man who does loses status and influence (proven); doubts go to the journal or a mentor outside the chain.
- 3 • ZERO GOSSIP ORIGINATED:** I hear everything, I repeat nothing negative. About the absent I say one true good thing – "He's always been straight with me" – or the full stop: **"I'd rather not talk about someone who isn't here."** Feedback goes to the face, never around the back. The one who gossips TO me gossips ABOUT me – and everyone in the room knows it. Gossip originators are measurably rated less trustworthy, less likable, less expert.
- 4 • LEAD BEFORE THE TITLE (the 18-month campaign):** ownership language – banned: "they didn't tell me," "not my area," "I was waiting on..."; replacement: "That's on me – here's the fix." • My boss hears bad news from ME first, always with a recommendation attached • **Artifacts advertise:** design docs, post-mortems, the Friday one-page note – the work is seen without my saying "I did this"; accomplishments stated plainly or not at all (humblebrag tests worse than silence) • In every meeting: speak EARLY, under 60 seconds, WITH a position • Credit given away by name – "Priya's analysis cracked it" • I am the thermostat, not the thermometer • **ONE SPONSOR, two levels up:** deliver on something they own, ask their advice on hard problems quarterly (advice-seeking RAISES perceived competence), make my name easy to say in rooms I am not in • Glue work refused politely; mission-central scope taken instead • I teach juniors on the clock – from this seat, that IS the audition.
- 5 • THE 50-HOUR CAP + INTEGRITY ABSOLUTE:** output flatlines past ~50 sharp hours – the surplus goes to visibility, training people, and the missions; I never announce that I protect my time. Competence mistakes: confessed within 24 hours, fix attached – nearly free. **Integrity is unrecoverable capital:** one lie, one two-faced moment, defines me permanently. I say nothing behind a back I would not say to the face.

THE PRICE OF A BREACH

LAPTOP ALIVE PAST 9:00 PM – even by a minute **50 KM. WALK IT. AUTOMATIC.**

A VAULT OPENED • GOSSIP ORIGINATED
• LAPTOP IN ANY ROOM BUT THE OFFICE **10 KM. WALK IT.**

INTEGRITY SLIP – a lie, a two-faced moment **50 KM + APOLOGY TO THE FACE.**

PAID WITHIN 24 HOURS. NO EXTENSIONS. Rails: **food and sleep are NEVER the currency** – the machine is never punished, only the man's time • walks daylight only, never after 7 PM • flat, no compounding, subject to Rule 00's 50 km weekly ceiling • logged in pen on Sunday.

WHY – WHAT THE EVIDENCE ACTUALLY SAYS

Performance QUALIFIES me; sponsorship, conduct, and presence SELECT me – tenure by itself selects nobody. Hours past ~50 add zero output and burn the machine; endings set culture, and the man who cannot stop teaches everyone that presence is the metric.

One integrity failure is judged as a permanent trait; an owned mistake with a fix is nearly free. Gossip pays the originator in temporary belonging and charges him in permanent trust.

*And the oldest line under all of it: I have a right to my effort, never to its fruits. Full intensity till the wall – full release at it. **The work is the reward. Tomorrow's block is already scheduled.***

Deliver excellent work – then make it impossible not to notice, without ever saying so. 18 months. One sponsor. Zero gossip. The wall stands.

◆ MEN RULE 03 • THE FORTRESS – BRAHMACHARYA

ANUPAM KUMAR • IN FORCE FROM AUGUST 24, 2026 • ONE PAGE • KEEP PRINTED • THE HARDEST BOOK IN THE CONSTITUTION

NO PORN. EVER. ON ANY SCREEN, IN ANY COUNTRY, IN ANY MOOD.
THE URGE IS NOT THE ENEMY – THE DOORWAY IS • OJAS IS CAPITAL, AND I DO NOT SPEND CAPITAL ON SMOKE

THE RULES

- 1 • THE DOORWAYS ARE ALREADY SEALED – I keep them sealed:** porn requires three things at once – a screen, privacy, and a late hour. Rule 01 already outlawed all three: the phone lives in a drawer and never enters a bedroom or bathroom, the laptop is bagged at 7:00, the router dies at 8:15, no feeds exist on anything I own. **This rule exists to finish the wall:** family-filter DNS (NextDNS/CleanBrowsing) on the router and every device, its password written on paper and locked in the locked room. I never fight porn – I make it unreachable.
- 2 • THE BED IS FOR SLEEP. NOTHING ELSE HAPPENS THERE:** never horizontal with any screen, anywhere on Earth • at 3:30 the alarm means FEET ON THE FLOOR – no lingering awake in bed, morning or night • the bathroom is for water, in and out. The relapse never begins at the act – it begins twenty minutes earlier, lying down, bored, alone. I do not enter the twenty minutes.
- 3 • THE 90-SECOND PROTOCOL – when the urge rises:** the urge is a wave, not a command. It peaks and passes. I STAND UP → leave the room → cold water on the face → 10 slow breaths → 20 push-ups or straight out the door for a walk. I never negotiate with it sitting still, and NEVER lying down. Ride it standing and it dies in minutes – every single time it has ever been ridden.
- 4 • KNOW THE FOUR GATES – H.A.L.T.:** Hungry • Angry • Lonely • Tired. Every past breach walked through one of these gates. When two are open at once, that is a RED ALERT evening: extra vigilance, earliest lights-out, the wind-down rituals done with full attention. Loneliness is the widest gate – the Sunday family call and one maintained friendship are Fortress defenses, not social niceties.
- 5 • TRANSMUTATION – the energy has a job:** Ojas conserved is not energy suppressed, it is energy REDIRECTED – and my system is already the redirection: the 5 AM training, the cold water, Mula Bandha, the Brahmacharya mala at 4:02, the missions. A full day leaves nothing for the urge to feed on. The Fortress is not built at night; it is built at 3:30 AM.
- 6 • WITNESSED, AS ALWAYS:** the FORTRESS line in the daily check-in (CLEAN / BREACH), urge intensity logged 1-10 – a logged urge is a defused urge. Streak counted. Sunday review, in pen.

THE PRICE OF A BREACH

PORN VIEWED – any duration, any screen **50 KM. WALK IT.**

FULL RELAPSE (PMO) **100 KM. THE CAPITAL PRICE.**

THE CLOCK STARTS AT THE BREACH – THE FIRST KILOMETRES ARE WALKED WITHIN 24 HOURS. No convenient days, no scheduling. 50 km completes within 2 consecutive days; 100 km within 4 consecutive days – daylight only, easy pace, fueled. The capital price stands above Rule 00's weekly ceiling – the constitution's only exception. While it is being paid, all other penalty accrual pauses – prices never stack. **FLAT. NO COMPOUNDING – the old +10 km/day is ABOLISHED** (compounding debt is how shame builds, and shame is the fuel of the next relapse). **When the last kilometre is walked, the account is CLOSED:** streak restarts at 1, and the breach is never spoken of again – not even to myself.

WHY – THE MECHANISM, NOT THE MORALITY

Porn is the same engineered machine as the feeds – a supernatural stimulus wired to the same dopamine circuit that Rule 01 evicted from my phone; it is the feed's older, stronger brother, and it hunts the same hours: late, alone, horizontal. My own record shows every collapse of discipline and every 2 AM bedtime travelled together with it.

The evidence on relapse is equally clear: shame does not prevent the next fall – shame CAUSES it. That is why the price here is heavy, immediate, physical, and then permanently CLOSED. I pay in kilometres, never in self-hatred.

And the oldest reason, in my own tradition: Ojas is the capital from which the 3:30 mornings, the deep study, and the racing body are all financed. A man guards his capital. That is the entire rule.

The Fortress is not defended at midnight by willpower. It is defended at 7:00 PM by a drawer, a bag, a dead router – and a man already asleep.
